

Cornwall Council and Members of Cornwall Climate Action Coalition Summary points - online meeting 15th December 2022

Topic: Climate Commission Model - continuation

Present:

Cornwall Council (CC)

Cllr Martyn Alvey: Portfolio holder for Environment and Climate Change

Mark Holmes: Manager, Carbon Neutral Cornwall

Cllr Linda Taylor: Leader Cornwall Council

Cllr Louis Gardener: Portfolio holder for Economy, good growth fund, SPF, LUF, energy policy parts of NQ airport & spaceport and councillor for NQ & Pentire

Cornwall Climate Action Coalition (CCAC)

Karen Jeffereys

John Carley

Helen Angel

Tom Pine

Andrew Stott

Q1: The Climate Commission

What has the Council found out about the climate commission model from their contact with 'Place based Climate Action Network (PCAN)?

- CC had met with Andrew Goldstein members of PCAN* (one of the research fellows and professor of economy at Leeds University, and the independent chair of Leeds Climate Commission). PCAN is a 5 year funded programme which has supported the development of 20 commissions across the UK. The different models were discussed. LA's generally do not lead on commissions but have a seat on them. A number of commissions are funded by universities. Commissions are not for lobbying or campaigning.
- It was evident that each commission varied in size depending on the area that it represented so some had as few as 10 members and the largest one (Yorkshire and Humber) ran with 40 members plus a series of sub boards.
- CC subsequently attended a meeting of the Yorkshire and Humber Commission and also attended the extended network that they call PCAN plus. This is a networking opportunity for the different chairs and leads of the commissions around the UK to come together to share good practice. CC had found this meeting really interesting, it was well resourced and led by a university who had secured additional funding. There were also LA attendees present. CC likened the structure to Cornwall's Sectors and Partner Group explaining there were key representatives from sectors to industry as well as community representatives.
- Because their university had secured additional funding the Yorkshire & Humber Commission was running sub and working groups that focused on industry, transport and land

Cornwall Council and Members of Cornwall Climate Action Coalition Summary points - online meeting 15th December 2022

use resilience. Their progress updates are loaded onto a website similar to CC's: "The Hive". They run a series of consultations through their website and have links to their action plan.

- CC noted that the first 3 commission meetings were independently chaired by someone outside of the region. This led to a sharing of Terms of Reference, ownership mapping and to who and how people could be involved.
- CC and Carbon Neutral team are writing up the findings and terms of reference and doing a bit more digging around on the other models.
- Questions that arise for CC are:
 - What does it mean to other groups that are in operation?
 - What would be the implications in terms of the budget?
 - Where do LAs have a role?
- CCAC mentioned that commission members would be volunteers and that as existing commissions all have academic input Cornwall's could be Exeter/Falmouth University. CC confirmed that the Tremough campus would probably have an interest, Exeter Uni is an obvious choice.
- Commissions have representation of maybe 1 or 2 from community organisations, industry, academia, and infrastructure organisations (water board, electric, gas). CC feel that the current Sectors and Partners Group mirrors this. It covers transport, housing, academia, visitor economy, construction, communities and those with lived experiences, international perspective, farming and agriculture.
- CC will be looking into another aspect: "The Climate Readiness Assessment" that PCAN offers. This reviews the sectors' readiness to respond to climate change in areas such as funding, policy, skills and public buy in. CC feels that much of it will align with the LAEP starting next year.
- CC: Cornwall is the only LA to have a rural climate and emergency planning document. The approach the commissions were using were much the same as the way Cornwall developed their DPD.
- CCAC: invited CC to look at what Essex have done in that they have produced a document based on the recommendations of their commission and it appears more robust in how it expects things to go forward. Essex is pursuing about 65 actions by comparison; CCAC have only found about 18 in the Cornwall 2030 plan.
- CC are developing a review of the options and in the process drawing in views from the IoS Leadership and those involved in climate commissions. It will be made public and this is expected by the end of January.

Cornwall Council and Members of Cornwall Climate Action Coalition Summary points - online meeting 15th December 2022

- CC noted that costs as indicated by PCAN, were not what had been expected. CC would need to establish what might/might not be available from PCAN and any implication that might flow from that.

Q2: Timeline and budget

Please outline what is the timeline and process for adding an item to the annual budget?

- CC indicated it would likely be a diversion of existing funding within the carbon neutral budget. CC added that they would want to consult with the partner groups that might be affected and may fold if the commission route is followed.
- CC thought the CIC route is particularly attractive for partnership working. It was confirmed that there is currently no specific budget line for a commission model.
- CC thought that having a commission with a degree of independence would allow the work they are doing to be more visible. But some of the groups they already meet with and work with are worried that they will lose their chance to speak directly to CC.
- CCAC suggested smaller sub-groups from the main commission with working groups involving other people feeding into those small groups
- CCAC asked for detail on where we are against each of the set objectives and CC answered that the quarterly performance report ** should have that detail.

Update on Shared Prosperity Fund SPF (See previous notes of meetings 1st Sept and 20th).

- CC gave an update on the scope of some of the projects to be funded by the SPF.
- Applications from right across the board were coming with green initiatives incorporated. CC have allocated £1m of SPF directly into boosting the insulation programme. Other bids have come in for new builds and community hubs with carbon neutrality and energy issues right at the height of their design.
- At a larger scale there are bids connected to the burgeoning floating offshore energy industry which includes supportive engineering companies all aligned to solving the UKs future energy needs. Those organisations that are demonstrating a clear commitment to carbon neutrality are scoring much higher in the bid assessment process than those that do not. CC are extremely pleased with applications.

Cornwall Council and Members of Cornwall Climate Action Coalition Summary points - online meeting 15th December 2022

- A version of the Decision-Making Wheel is being used against the bids. The same questions are being asked through the triage process including whether a bidder is paying the real living wage.
- Cabinet has just agreed the framework for the Rural Prosperity Fund. This is an additional £5.6m on top of SPF (total £137.6m).
- CCAC: hitherto funding streams had been very centralised, but it is hoped they would become more decentralised so as decisions could be more locally focussed. It is thought a commission model could provide a helpful steer to bring this about.
- CC asked CCAC to look and participate in the devolution consultation and a Cllr specifically said they would be happy to answer any questions or queries and to please email them.

CCAC post meeting reflection

- The issue of a Climate Commission Model has recently been raised with CC from a number of routes: Public question to full CC; question to CC from within CC i.e. an elected councillor and via CCAC meetings. As a result of this multi levelled approach CC have listened, taken this topic forward and are now exploring the options.
